## SUMMARY

Seasoned Ruby on Rails developer with experience in a wide range of technologies and projects (e-commerce, education, telecom, CRM, etc.). I pay great attention to writing clean and maintainable code, automated testing, effective communication, and deep understanding of a business domain.

## SKILLS

- Ruby on Rails (5+ years)
- TDD/BDD: RSpec, Capybara
- PostgreSQL
- Background jobs (Sidekiq)
- Authentication, authorization (Devise, CanCanCan; OmniAuth; AWS IAM configuration)
- Payment system integration: Stripe, MandarinBank
- REST API
- Frontend: HAML, SASS, Bootstrap; JavaScript, jQuery, CoffeeScript
- Server setup and deployment: Linux, Nginx, Passenger, Capistrano; Circle CI
- Monitoring: Airbrake, Datadog
- Debugging and performance optimization

## OTHER SKILLS
Requirements analysis, UX prototyping.

## EXPERIENCE

**SHOW-SCORE, New York (remote)**
**Ruby on Rails Developer**, April 2018 — March 2020
Show-Score is a community of people who enjoy theater.
I had been working on backend and full-stack implementation of new features/tools for members and admin team, refactoring, performance optimization, increasing of test coverage, email marketing related tasks. Implemented internal currency system, back office system for theater producers, geo location services; created API services.

Tech stack: Ruby on Rails 5, PostgreSQL, RSpec, Sidekiq, Mandrill API, Stripe, CoffeeScript, React.

**AIRSTRIPE, Madrid (remote)**
**Ruby on Rails Developer**, October 2017 — January 2018
Airstripe is a flight reservation startup. I built the site from scratch, including server setup, implementation of booking system, integration with Stripe, internationalization, and admin tools. Tech stack: Ruby on Rails 5, Postgres, Sidekiq, RSpec, Capybara, Bootstrap, Stripe Elements.

**THINKNETICA, Moscow (remote)**

**Ruby on Rails Developer**, February — October 2017

Built CRM system for a popular Ruby programming school, including modules for invoicing, managing courses, groups and students. Implemented payment system integration (MandarinBank). Created automated tests at all levels.

Tech stack: Ruby on Rails 5, Postgres, Sidekiq, RSpec, Capybara, Bootstrap.

**GOSSTANDART EXPERT**

**Ruby on Rails Developer and co-founder,** January 2013 — April 2018

Built CRM/ERP solution for managing business processes of the company.

Tech stack: Ruby on Rails 4/5, RSpec, Capybara, Bootstrap, jQuery.

**USABILITYLAB**

**Project manager at UX agency**, 2012 — 2013

Ran projects related to user experience research, design, usability testing, and eye-tracking.

**KAVANGA!**

**UX designer,** 2009 — 2012

Designed user interfaces for a digital advertising platform.

Gained a lot of experience in requirements gathering and communicating with stakeholders.

**OPENTODO**

**Author of open-source project**, 2008 — 2009

Created an open-source task management application. Tech stack: Python / Django.

**KOLATELECOM**

**Lead software developer**, 2006 — 2009

Built intranet system for business processes automation; control panel for ISP subscribers; e-commerce portal with the ability to buy movies and music. Implemented modern software development practices: version control, staging server, TDD. Tech stack: Python / Django, Perl, PHP; MySQL, Oracle.

**ARCTIC MEDIA GROUP**

**Web-developer**, 2005 — 2006

Created websites for clients of the digital agency. Tech stack: PHP, MySQL, JavaScript.

**NETSL**

**Web-developer**, 2003 — 2004

Built bug-tracking system, intranet modules, and websites, including e-commerce projects.

## CODE EXAMPLES

**Big Business — starter CRM/ERP app**

GitHub: https://github.com/mgrigoriev/big_business

## EDUCATION

**Murmansk State Technical University** (2000 — 2005): Management, specialist degree
